

Winter 2011 ESCC/Internet2 Joint Techs meeting will be held in Clemson, South Carolina, and will focus on topics such as advanced infrastructure, emerging technologies and convergence.

Sunday January 30 to February 2 will be held the 2011 winter meeting of ESCC and Internet 2, which will bring together representatives from around the world in technology and will discuss topics such as innovation and infrastructure advanced.

During the event there will be four tutorials on MPLS, DNSSEC, Colo/Telco Facility Installations and IPv6.

The meeting will be hosted at the University of Clemson, South Carolina, and will coincide with the development of other related events such as the ESnet Site Coordinators meeting ComITT Meeting, a workshop on IPv6 (2 to 4 February) and a workshop about the performance of the networks (2 and 3 February).
