

The forum will take place on November 30th to December 2nd at the Imperial Palace Hotel in Seoul, Korea. The pre-registration period will be open until November 18th, 2011.

Global Future Internet Summit is a forum where global leaders in the field of Future Internet get together to share their visions and experiences as well as strategies for successful advancement of this important initiative now picking up pace everywhere in the world.

Experts from all continents are to be represented to highlight key issues on the way toward a common goal of Future Internet. A holistic approach encompassing not only advanced technologies but also socioeconomic and cultural implications including sustainable development and combat against digital divide shall be pursued at this Summit.
